

# Software

## [Websphere Application Server] Java WebService throwing javax.xml.ws.WebServiceException with Invalid Endpoint Interface

Symptom

**javax.xml.ws.WebServiceException: The Endpoint validation failed to validate due to the following errors: :: Invalid Endpoint Interface**

Solution

Masuk ke WAS Console

**Application servers > server1 > Process definition > Java Virtual Machine > Custom properties**

Tambahkan custom properties

**jaxws.ignore.extraWSDLops = true**

Unique solution ID: #1007
